

# Pre-K December Math Focus

Dear Pre-K Families,

This month our class is learning about **Number Sense** and **Geometric Solids**.

- Number Sense: numbers 0-5
- Geometric solids: sphere, cone, cube, and cylinder

Here are some fun activities that are easy to do at home to help reinforce these concepts:

- Count items at home, for example, one door, two shoes, three pencils, four chairs, and five buttons on a coat.
- Look for geometric solids when out for a walk or at home such as a ball (sphere), a party hat (cone), a box (cube), or a soup can (cylinder).

Thank you for working with us. We hope that you are enjoying doing these activities with your child.

☺ Pre-K Teachers
